To whom it may concern,

Aveni Chen was founded in response to years of families in the community suffering in silence from complex mental health crises.

Severe depression, mental breakdown and other mental health events that reach situations of pikuach nefesh, can utterly tear apart an entire family. Families once functioning normally find themselves alone and terrified.

The goal of "Avnei Chen" is to support and assist these families through the complex maze of the mental health system as well as to provide familial support in times of crisis. Guidance provided includes hand in hand support to provide immediate services during a crisis, referrals to the most appropriate mental health professionals based on the issue as well as legal and communal support. From connecting with hospitals and government organizations, family rehabilitation and beyond, Avnei Chein with Bisyatta Dishmaya can help families return to normal life.

Rabbi David and Judy Green along with Sol and Fran Jakubowicz have taken upon themselves this great challenge with the goal of being the primary and central address for those who are lost in the confusing bureaucracy of the various authorities and bodies, and to give every family in the community access to the desperately needed support and tools needed to overcome their crisis.

I urge you to support this life saving cause.

Shmuel Z. Eidensohn
Chairman
