Avnei Chein is making a major contribution to our community by providing guidance and advocacy for people suffering from mental health issues and trying to navigate the complex system. This is a huge challenge, causing untold levels of suffering for many families.

People should no longer have to suffer in isolation and silence. By guiding people through the complex maze of relevant organizations and providing numerous forms of family support, Avnei Chein is effectively filling a critical gap in our community. The organization was created by Baalai Chessed who together with local Rabbonim have put together a group of serious, experienced and highly professional individuals who are working to create a better path forward.

I support their efforts and encourage those who have ability to strengthen this organization to do so.
